

HIGHLANDER PAPER RECYCLING

“At the Peak of Paper Recycling”

Introducing our NEW self-loading “Moffett Mounty” bale, tub and pallet collection service!

Highlander are proud to announce our new self-loading bale, tub and pallet collection service, now ready and available to collect YOUR recovered paper grades all round central Scotland! This service is ideal for organisations who bale or simply palletise or place their waste paper grades into plastic tubs, but who have either no or limited access to a suitable forklift truck for loading collection vehicles.

Let Highlander take the strain for you with our “Moffett Mounty” lorry mounted forklift truck collection service, meaning we can load **our own collection truck** using our **own** forklift, **quickly, safely** and with **zero fuss!** Our drivers are fully trained, insured and 100% certified to operate the truck and forklift in your premises, in a **SAFE & LEGALLY COMPLIANT** manner!

Here's how the system works:

1. Contact our commercial team for a **FREE** recycling survey and bespoke recycling proposal – we promise to have this proposal with you within 48 hours of our site visit!
2. Agree commercial terms and sign a legally required “Waste Transfer Note” to satisfy all legislative requirements for the collection and recycling of your waste paper materials.
3. Call our dedicated transport department for a collection of your bales, tubs or pallets at **01355 524 215** or email at collections@highlanderinternational.co.uk
4. We will arrange to visit your site with our “Moffett Mounty” to collect your bales or pallets within 48 hours of your collection request being received by our transport department.
5. Our driver will arrive on site and seek permission to demount our forklift – we will always do this in an area which is safe and in conjunction with your site rules.
6. We will carefully load all the bales, tubs or pallets of material onto our collection vehicle – our driver is highly trained, certified, insured AND experienced in all Moffett Mounty operations!
7. Once cleared or the vehicle is fully loaded to capacity, we will strap the load in making it safe for transit, then close and securely retain the vehicle curtain.
8. Finally, we will get our paperwork signed by a member of your staff and then depart from your premises in a safe and diligent manner – simple as that!

HIGHLANDER PAPER RECYCLING

"At the Peak of Paper Recycling"

Calling on all Printers!

The "Moffett Mounty" service is ideal for Printers too! Highlander can provide collection tubs in excellent condition to your operations - these allow you to gather your printer's waste off-cuts or spoils in a safe and efficient manner! These robust tubs can be moved around your factory using either a forklift or pallet truck and when full, simply wrap the top of the tub in shrink wrap to keep the material dry then take these to your yard area for later collection. Again, when you have enough tubs ready to be collected, simply call our dedicated transport department for a collection at **01355 524 215** or email at collections@highlanderinternational.co.uk and we will service you within **48 hours!** Our driver will follow the simple steps for utilising our Moffett Mounty as described on the previous page however this time, we will drop off empty tubs before safely loading your loaded tubs on to our collection vehicle! The whole process is easy and safe and allows your forklift to be used for jobs that help you service your customers!

Who does this service help?

Our self-loading "Moffat Mounty" service is already being enjoyed by a wide range of customers, all over central Scotland! Examples of some industries and situations we have serviced using this innovative system include:

- ◆ Shopping centres
- ◆ Retailers / retail parks
- ◆ Distribution centres
- ◆ Storage companies
- ◆ Document / archive storage
- ◆ Manufacturing sector
- ◆ Printing companies
